IMPORTANT

THANK YOU FOR PURCHASING SEAFLOOR SYSTEMS' PRODUCTS FOR YOUR SURVEYING NEEDS.

Please read through all of these Instructions and tips before proceeding with the operation. We do our best to provide a simple setup process for all applications however please contact your nearest authorized dealer if you encounter issues.

Always disconnect any power sources connected to your vessel before servicing vessel or accessories.

STEP: 1

Remove the vessel from the case. Remove the remote case from the top of the lid. Remove all accessories from accessory pouch located at the bottom of the case.

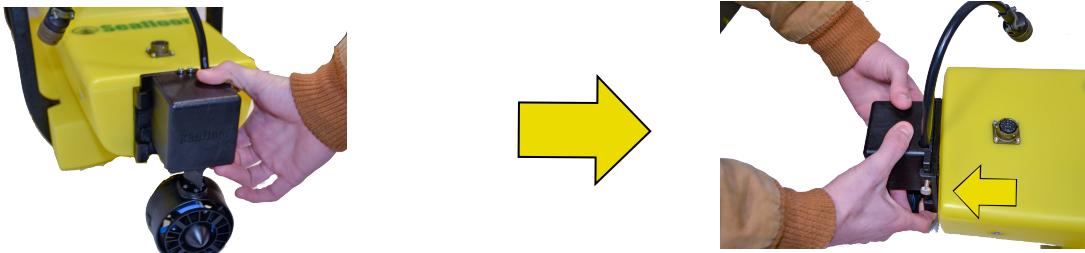

QUICKSTART INSTRUCTIONS

STEP: 2

Attach the thruster to the rear bracket of the vessel and secure by tightening retaining screw.

STEP: 3

Insert fully charged 4S battery and connect to power distribution cable.

STEP: 4

Open bow hatch lid with provided hatch wrench, and remove lid.

STEP: 5

Run the data collector cable through the inside of the hull through to the hull hatch lid.

QUICKSTART INSTRUCTIONS

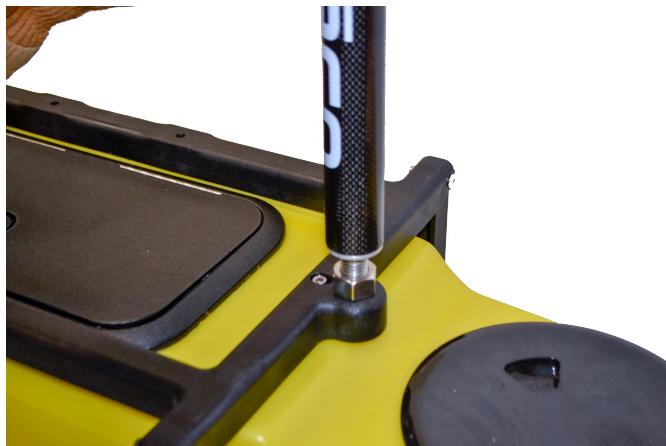

STEP: 6

Connect data collector cable to transducer.

STEP: 7

Attach antenna to the mounting screw located at the front of the frame.

STEP: 8

Connect the thruster cable to the bulkhead located at the stern of the vessel.

QUICKSTART INSTRUCTIONS

STEP: 9

Switch power to the "On" position.

STEP: 10

Connect the remote by holding the power button for approximately 2 seconds. The remote will beep when activated. You are now ready to survey.

Operation: Be sure to observe and follow all local water safety regulations and procedures. Always operate vessel within line of sight, and immediately stop operation if hazards or safety risks arise.

Your setup is now complete.
