

# ECHOCART/LARS™

Single User Launch and Recovery System

The EchoCart & Launch and Recovery System (LARS) is a modular transit and deployment platform. The EchoCart allows for efficient transport of vessels to the launch ramp. The LARS davit add-on enables a single person to lift heavier vessels out of a truck bed, onto the EchoCart, and into the water.

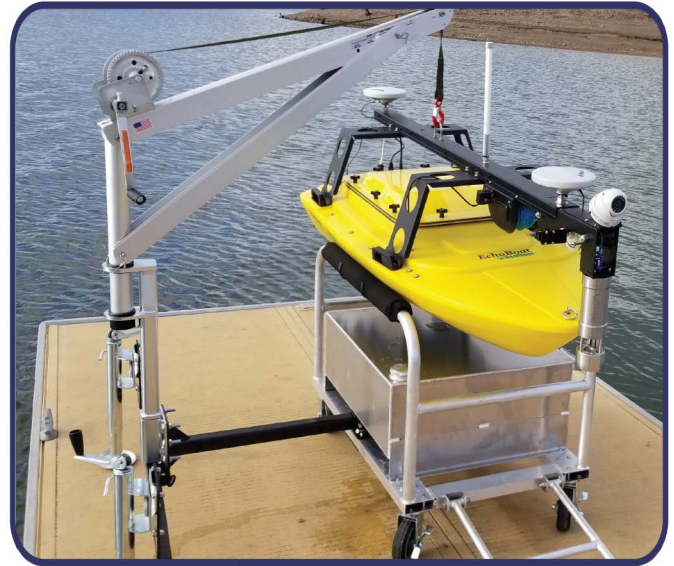

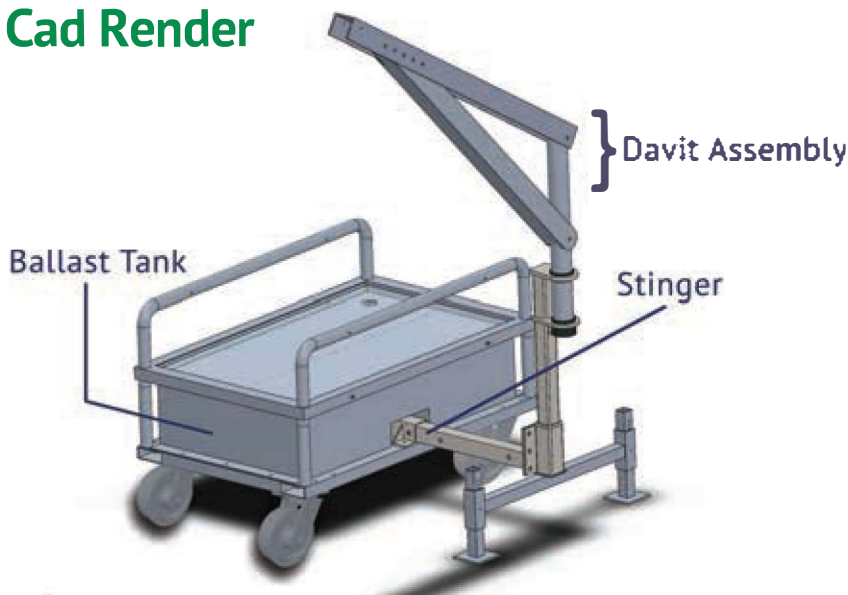

## EchoCart Features

- ▶ Maneuverable caster wheels
- ▶ Removable stabilizing ballast tank fills and drains in 3 minutes via the integrated water pump and release valve. (Only included if using LARS add-on)

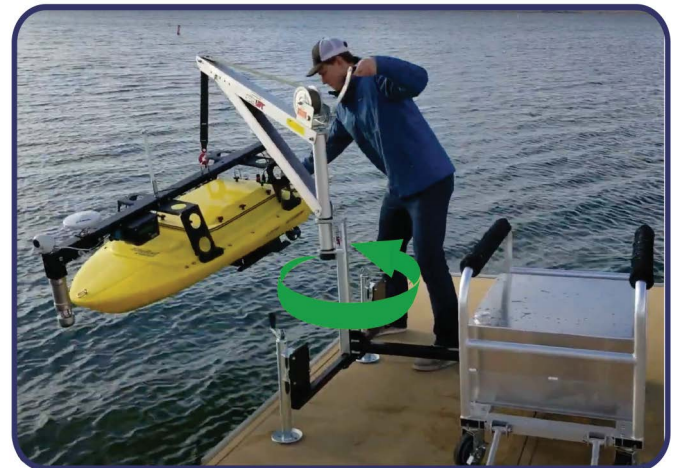

## LARS Features

- ▶ Stinger can be inserted into trailer hitch receiver during transport, then attached to EchoCart on site
- ▶ Davit rotates 360°
